I am a passionate Frontend Web Developer with over one year of experience in building eye-catching, responsive websites. I specialize in full-stack web applications, leveraging modern technologies to create seamless and engaging user experiences.

## Skills

• Tailwind CSS   • JavaScript   • React JS   • Google Firebase   • Node JS   • Express JS   • MongoDB   • Next JS

## Projects

### 1. Poultry Hub

Poultry Hub, a sleek and minimalist e-commerce web application designed for farmers and consumers alike. Poultry Hub offers a platform where farmers can sell fresh, farm-raised products such as chicken, eggs, feed, and more. Consumers can purchase high-quality, natural products directly from trusted farms. Poultry Hub provides innovative AI-powered tools to help farmers build smarter farms or factories, enhancing productivity and sustainability.

**Category:** Farm management and E-commerce

[Live Link](#) | [Repository](#)
